

WELCOME ABOARD, KEA

Keatlaretse Senoamere joined us in November last year as our Social Impact Specialist, bringing passion and dedication to supporting community growth and development. She works closely with our community to build positive, lasting impact.

Kea values the dynamic nature of community work. **"Every community has its own strengths, challenges, and untapped potential, so you're constantly learning and adapting,"** she says.

She hopes to help build inclusive, sustainable communities by supporting small businesses and contributing to community-driven development through listening, engagement, and co-creation.

PARYS WETLAND PARK OFFICIALLY RE-OPENS

Community members gathered on 28 February 2026 to celebrate the official opening of the Parys Wetland Park, a revitalised space connecting Tumahole, Mimosa Gardens, and surrounding areas.

The event, supported by Ilikwa Solar, brought residents together for a morning of activities, including a fun run, guided birdwatching, and a mountain bike challenge.

The ribbon-cutting ceremony marked a proud moment for the community, celebrating the park's transformation and encouraging residents to enjoy, protect, and take ownership of this shared natural space.

GOLD, SILVER & BRONZE AT 2025 ESKOM EXPO

Three Grade 11 learners from Barnard Molokoane Comprehensive School have made Parys proud by winning gold, silver, and bronze at the Eskom Expo for Young Scientists last year. Achieving the only gold medal (80%+) for the Fezile Dabi municipal region, Andile Malubela impressed the judges with his 'Intelligent Navigation Spectacle Glasses', to assist people with visual impairment or blindness, securing his progression to the national round of the competition.

"We were proud to be able to support the school's entry into this annual competition, as well as their strong focus on coding and robotics in general. We can see how it is helping learners build confidence and practical skills for the future." - Jo-Anne Brown, Country ED Manager, Ilikwa Solar

These additional ICT subjects are equipping young people to think differently, solve everyday challenges, and explore new opportunities in an increasingly digital world.
